

TASK 6 - Define Trade and Quote Helper Parsers

TASK 5 - Cast Values to q Types

TASK 7 - Implement the Message Parser

NECESSARY KNOWLEDGE

- Function projections
- Dictionaries

I. AIM

The aim of this task is to define a working projection called `qparse` which is similar to `tparse`.

II. INSTRUCTIONS

Open `fh.q` and locate the line:

```
tparse:prs[ ; `TRADES;TRADE_FIDS];
```

Read the comment below pertaining to `qparse` and use the information to create `qparse`.

TASK 5 - Cast Values to q Types

Task 7 - Implement the Message Parser
